ABOUT CATALANO

“Quality is taken as a moral commitment at every stage of our manufacturing process”

Catalano

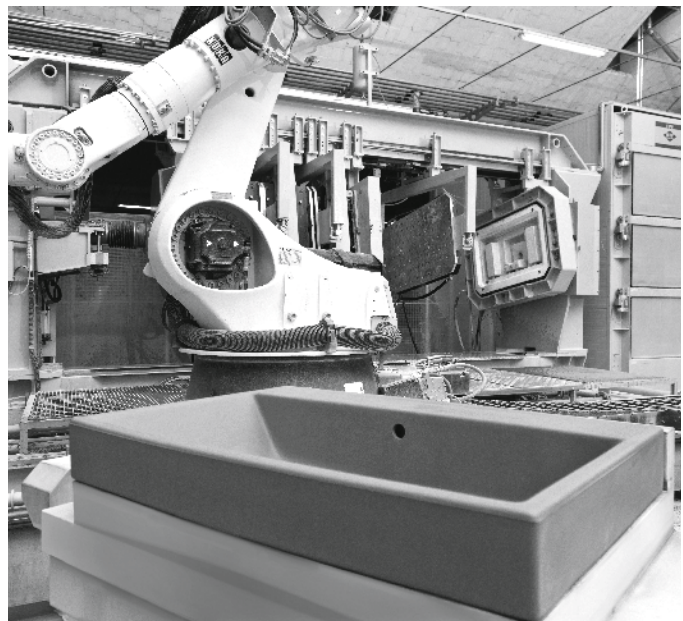

Founded in 1967, Catalano is a family run company based near Rome with a rich heritage. Catalano is proud to be a leading manufacturer and exporter of Italian ceramics.

The impressive Fabbrica di Roma factory plant has 70,000 sqm of offices and production departments are built on a total of 170,000 sqm. Here, the vision is innovative design and sanitary ware of a superior quality with respect for the environment being a key consideration.

Cutting edge technology is used in combination with traditional Italian craftsmanship for the finest ceramic collections. Sanitary ware collections are defined by their iconic designs, unmistakable quality and Italian sophistication.

Catalano's global reputation for excellence in ceramics is demonstrated in numerous projects around the world, as well as by awards received in recognition of its achievements.

Cataglaze+® is standard on all Catalano products.

CATALANO AROUND THE WORLD

Catalano is distributed in over 100 countries with ceramic collections featured in prestigious projects around the world.

Cataglaze+ Silver Titanium is an innovative treatment that not only reduces limescale deposits but makes cleaning ceramic sanitary ware easy through its powerful antibacterial action against germs and bacteria. The effectiveness of the new formula is ensured by the presence of silver and titanium ions in the blend. Antibacterial action is ISO 22196 certified with an effectiveness of 99,99%.

Silver Titanium

Constant research in the Catalano laboratories has resulted in a glaze that effectively takes advantage of the special chemical properties of silver and titanium particles. With these metals it has been possible to perfect a high performance composite glaze with excellent antibacterial properties.

Resistance to Chemical Agents

Cataglaze+ resists the corrosive effects of chemical agents found in cleaning products. Surfaces retain their shine and smoothness even after long exposure to these substances.

Respect for the Environment

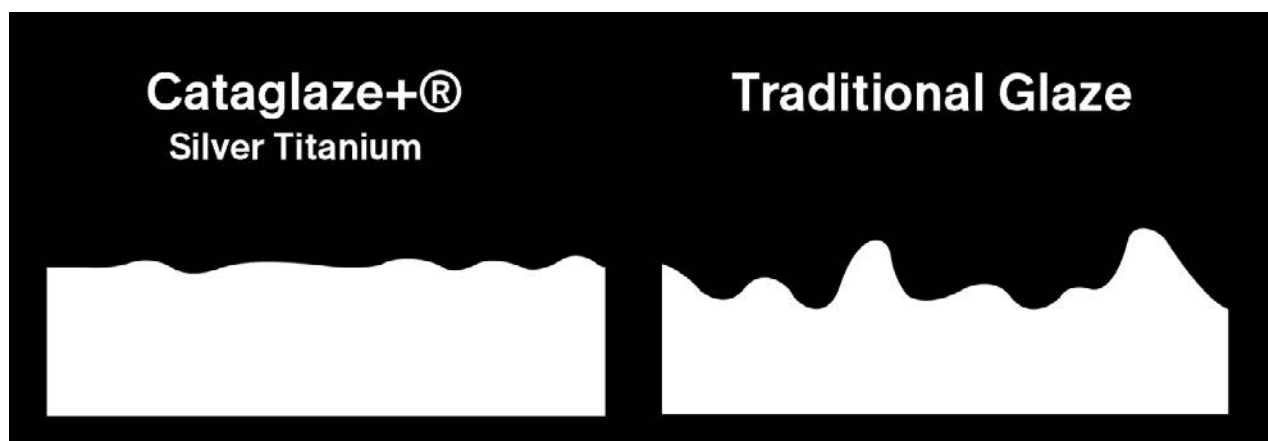

Cataglaze+'s ability to resist translates into less use of chemical detergents and water and more protection for health and the environment.

Quick and Easy to Clean

Cataglaze+ makes cleaning much faster, easier and convenient and saves time and water.

Antibacterial Protection

Cataglaze+ adds antibacterial protection on the surface itself, preventing bacteria from growing and spreading and making the bathroom environment safer and more hygienic.

Twinglaze+ is an innovation featured on Catalano WCs. The antibacterial treatment Cataglaze+ is applied with a glossy effect on the internal surfaces and matt on the outside. Twinglaze+ is a treatment that adds high tech value to the product while ensuring hygiene, respect for the environment and a modern and refined look. Catalano's special technology reduces limescale and improves flushing by reducing water attrition and optimizing consumption.

Silver Titanium

Constant research in the Catalano laboratories has resulted in a glaze that effectively takes advantage of the special chemical properties of silver and titanium particles. With these metals it has been possible to perfect a high performance composite glaze with excellent antibacterial properties.

Resistance to Chemical Agents

Twinglaze+ resists the corrosive effects of chemical agents found in cleaning products. Surfaces retain their shine and smoothness even after long exposure to these substances.

Twinglaze+ makes cleaning much faster, easier and convenient and saves time and water.

Antibacterial Protection

Twinglaze+ adds antibacterial protection on the surface itself, preventing bacteria from growing and spreading and making the bathroom environment safer and more hygienic.

Gold & Silver antiscratch glaze

Anti-scratch

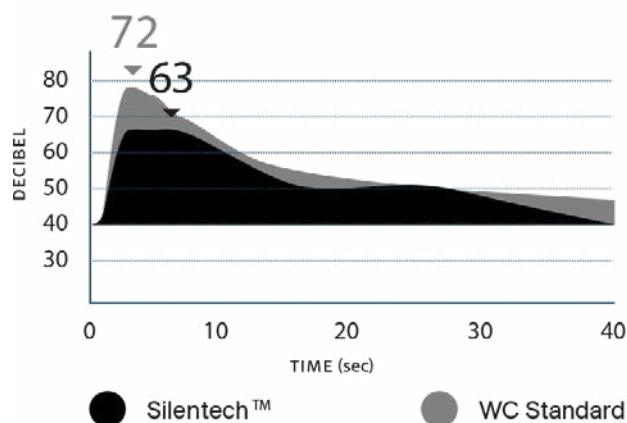

Through a complex, exclusive and extremely precise process, the precious Gold&Silver finishes are coated with a special antiscratch glaze that makes them resistant to abrasions, detergents and temperature changes just like a traditional finish. In addition, the antiscratch coating maintains the gloss of the metallic surface and protects it from the signs of wear.

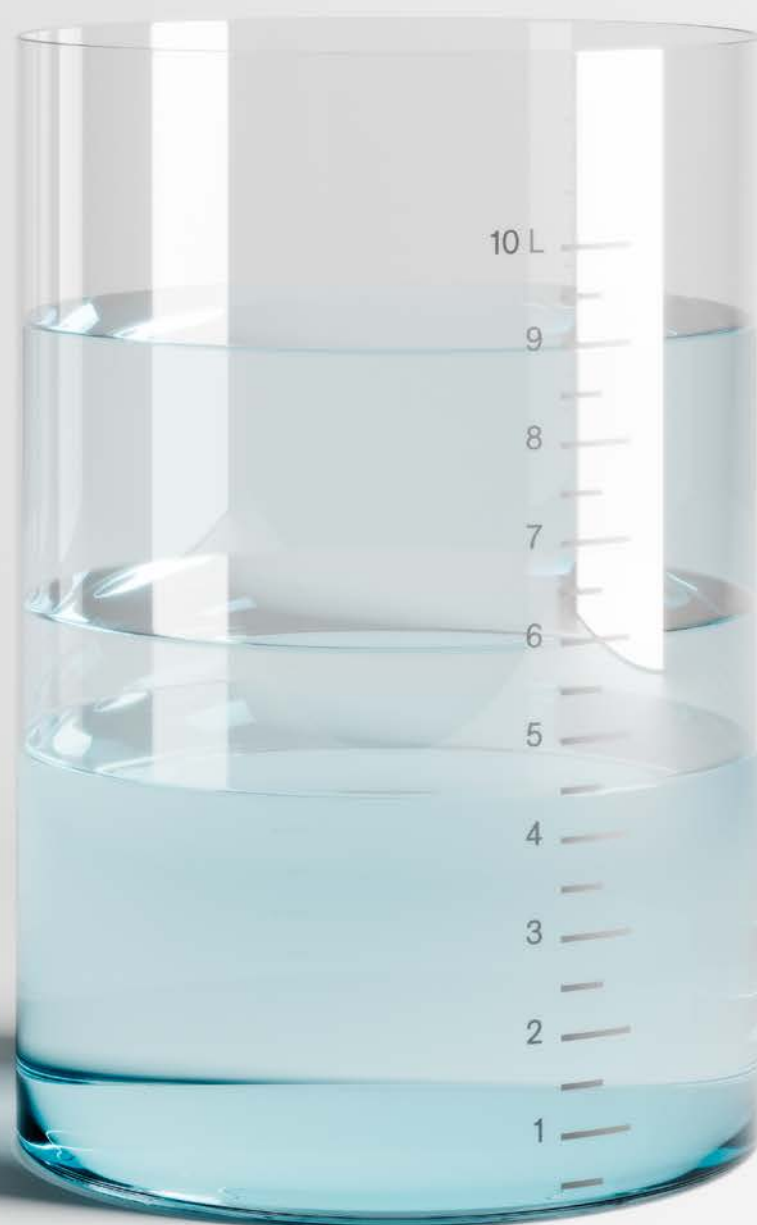

The system Silentech, invented by Catalano, is the most advanced rimless flushing system on the market. The absence of a surrounding rim, where germs and bacteria tend to congregate, guarantees maximum hygiene and makes the job of cleaning easier.

The new system has many advantages: a new design that optimizes performance in terms of hygiene, noise reduction and sustainability; it gives the wc a contemporary aesthetic; the swirling flow of water sets off a powerful mechanical action over the surface for impeccable cleanliness and so less need for chemical detergents; less noise; less water consumption.

- An award winning true rimless design for easy cleaning
- Vortex flushing system for optimal flushing performance
- Cataglaze+ is standard on ceramics for maximum hygiene
- Silentech WCs have antibacterial soft-close seats with take-off system
- Superior silent flushing

9

6

4,5

Save Water

Catalano’s flushing systems have been designed to use considerably less water (4.5 litres) than traditional systems which employ twice as much. This important difference translates into significantly lower water consumption, thereby reducing the impact on the water supply and conserving limited water resources. A fundamental action for environmental sustainability and a policy Catalano adopts every day across its entire production chain.

Litres of water generally used by a traditional Wc

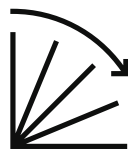

Required limit by European standards

Seat and cover

Soft Close

Quick Release

Antibacterial

Catalano's seats are designed to be the optimal wc accessory in all our collections. With their accurate, high performance design, Catalano seats maintain their characteristics unaltered over time and together with the ceramic part of the wc make for an extremely high quality product. Quality that has been proven time and again by numerous tests like the DIN 19515 standard.

Soft Close

The Soft Close closing system is a function that allows the seat to close slowly and in a controlled manner, avoiding sharp noises and accidental damage. Besides closing quietly, it offers more comfort and safety.

Quick Release

The quick uncoupling system makes removing the seat easier and faster without the need for tools. The seat is raised upwards in a single movement facilitating cleaning and maintenance.

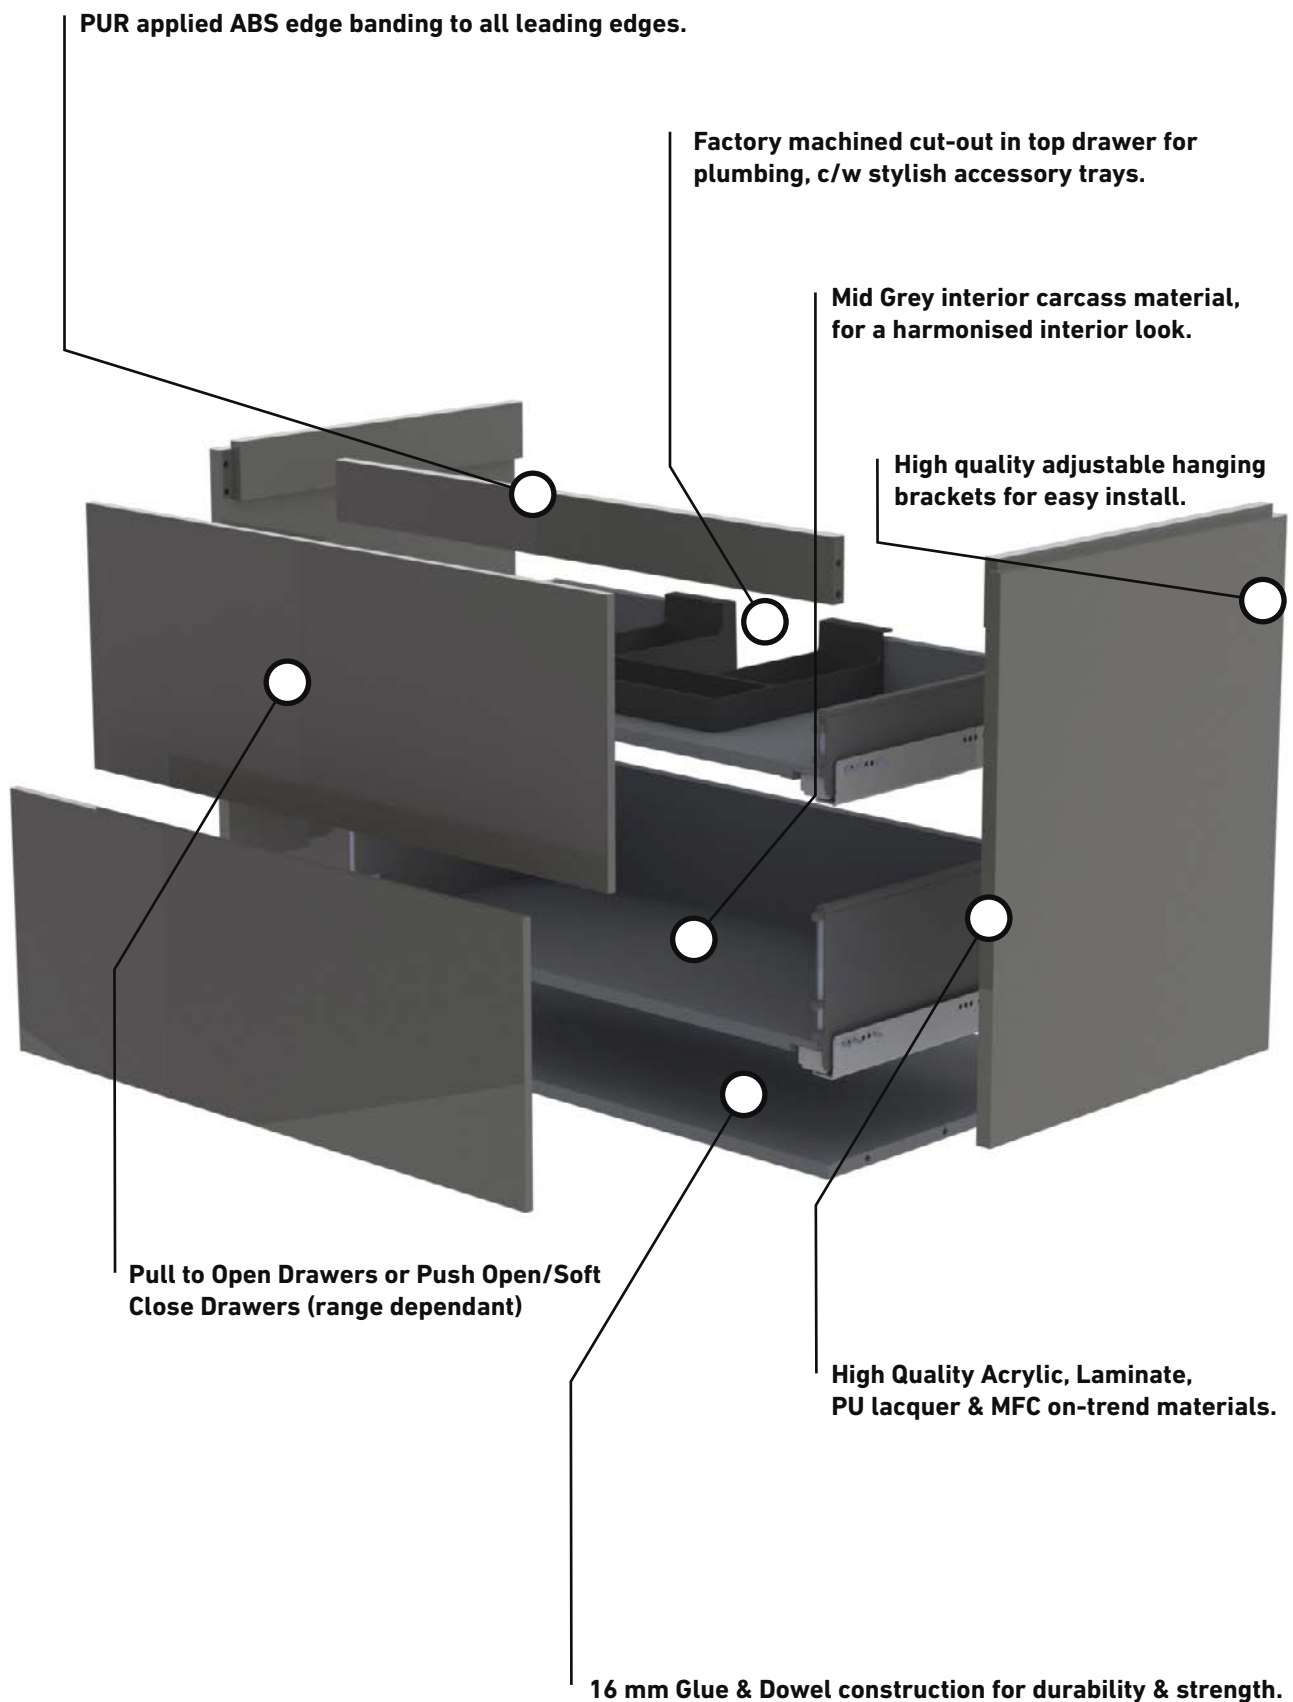

Antibacterial

For total wc protection, all seats are produced with FDA and EPA registered resins and antibacterial coatings that prevent the growth of germs and the proliferation of bacteria through the natural action of silver ions.

SOFTTOUCH & 5G VINYL – PREMIUM VINYL FURNITURE FINISHES

These latest premium vinyl additions to Elements Catalano furniture offer the most up to date vinyl surface finishes available. The SoftTouch finishes are silky smooth and in a range of contemporary colours. 5G woodgrain vinyl brings warm wood tones to life. The textured concrete finish in the collection has a unique and urban look. SoftTouch & 5G vinyl finishes are available for the Alvea and Progetto furniture collections.

ALL PRICES ARE RRP EXCLUDING VAT (NON BINDING)

The Catalano brand now means that our products incorporate the latest water saving technologies, easy cleaning ceramic surfaces and the use of high yielding production processes.

Catalano is a member of GBC Italy, the Italian association that works to promote and accelerate the diffusion of sustainability culture, driving the market transformation.

All the industrialization and production stages are technologically advanced, guaranteed by the most advanced plant for processing bathroom fittings in the world.

Washbasins are semi-punched and are stocked with 0 or 1 tap hole. Where there is the option, additional tap holes can be drilled. We provide a drilling service at the cost of £25.00 per tap hole.

The first company in the sanitary ware sector to obtain the ESG certificate (Environment, Social and corporate Governance).

In 2019, Catalano achieved EPD certification – Environmental Product Declaration (EPDITALY0075). With this certification, Catalano guarantees environmental control of product life cycles (LCA), in compliance with rigorous international standards, placing itself at the forefront of all other competitors. Achieving EPD certification is recognition of the company's attentive and continuous commitment to research and verification of all the environmental aspects of its manufacturing process.

CATACLEAN

All in One Concept

CATACLEAN

Advanced technology, ease of use, and perfect hygiene merge in a unique concept of smart modularity. This toilet-integrated technological system consists of various elements that can also be separated.

For example, the electronic bidet can be removed for update or maintenance purposes without altering the toilet's functions. This way, the latter can work independently through the patented exhaust system.

Cataclean Technology

CATACLEAN

Cataclean is where Catalano's technology and top-quality ceramic meet. This system includes washing and drying functions through stainless steel water nozzles. It also features self-draining and self-cleaning anti-limescale functions to ensure hygiene and safe maintenance. All functions can be managed from a wall-mounted display.

Toilet Bidet Integrated

CATACLEAN

The only one of its kind, Cataclean provides an easily removable electronic bidet, that can be installed or replaced very easily like a cartridge. It is inserted into the toilet bowl from above and is completely disconnected from its casing and from the seat. The toilet always works, even without the electronic body.

CATALANO

Warranty

Ceramics 5 years

WC seat 2 years

Furniture 5 years

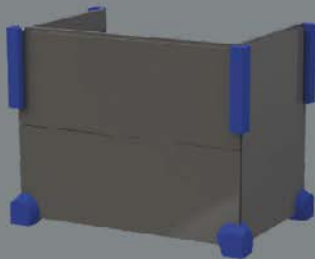

Cataglaze+® is standard on all Catalano products.

QC & Packaging

Quality Control and Packaging are important parts of our manufacturing process to ensure that finished products leave our factory and arrive in customers homes without damage and to a quality that we would expect if we were the purchaser. Quality control is a core part of the manufacturing process, however once the products are built the first main QC stage is at Assembly, followed by second stage at Dispatch before final packaging and boxing takes place. Anything found below standard will be replaced before dispatch takes place.

To prevent transportation/handling damages, all furniture is protected using blue foam protective corners and upper cushioning sections which are secured to the furniture, this ensures that once the outer box is removed and the unit placed on the floor it's still "protected". Each box is handmade due to the variety of sizes and mix of product that gets manufactured. This guarantees each box is tailored to be a snug fit.

Care & Maintenance

Cleaning of Elements bathroom furniture should only be undertaken with a damp cloth and light proprietary cleaning liquid. No abrasive creams or bleach type liquids should be used. Any spillages of water or liquid should be cleaned up

All furniture has an information swing tag attached, to primarily notify the installer of checks that should be carried out once the furniture is received on site. And secondly to educate the end user on aftercare instructions.

5 Year Warranty

Elements bathroom furniture is guaranteed for 5 years from the date of manufacture (2 years for all electrical items and mirrors), against manufacturing defects or product failure when used in domestic installations. This warranty is subject to installation in accordance with our instruction and care/maintenance guidelines as supplied with each furniture product.

In the unlikely event of a defect or product failure, liability is limited to supply of replacement individual components (or nearest equivalent) from the range and does not cover any consequential loss/damage, or any installation costs or financial compensation.

The customer will be required to provide information to us in order to validate any warranty claim. Full terms and conditions available on request.

As soon as you receive your bathroom furniture, it is important to check that it is what you ordered, and is not damaged in any way. Should there be any query in relation to the product, this must be reported in writing to your place of purchase within 3 working days. A resolution to your query must be agreed prior to commencing installation. Failure to do so may result in any query or claim being declared void.

Elements furniture is manufactured in the UK to a continuous improvement policy. We reserve the right to amend the product specification or dimensions without prior notice.

C - Donner un coup net au centre de l'éraflure

D - Rifinire il bordo del foro.

D - Finish the edge of the hole.

D - Lochrand fein bearbeiten.

D - Faire la finition du bord du trou

CATALANO

Use a neutral detergent or soap and warm water.

Lightly clean the surface with a soft, clean cloth; rinse with clean water and dry by absorbing with a damp cloth or chamois leather cloth.

Do not use household cleaners and solvents such as alcohol, acetone, paint thinners, etc.

To remove dust, use a soft damp cloth. Dry or rough cloths can scratch the surface.

To protect and maintain a bright surface or to remove small scratches you can occasionally use polish.

Apply a thin layer with a clean soft cloth and gently buff with flannel cloths or chamois leather.

Then wipe with a damp cloth to eliminate the static electricity that may attract dust.

Waschen Sie mit Seife oder neutralem Waschmittel und viel warmem Wasser.

Verwenden Sie ein weiches, sauberes Tuch mit leichtem Druck, spülen Sie es mit sauberem Wasser ab und trocknen Sie es mit einem feuchten Tuch oder Hirschleder ein.

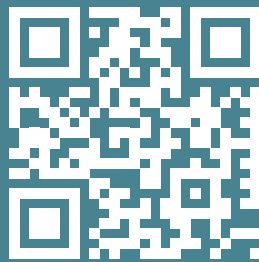

Verwenden Sie keine Haushaltsreiniger und Lösungsmittel wie Alkohol, Aceton, Farbverdünner usw.

Verwenden Sie ein weiches, feuchtes Tuch, um Staub zu entfernen. Trockene oder raue Tücher können die Oberfläche verkratzen. Sie können die Oberfläche schützen und glänzend halten oder kleine Kratzer durch gelegentliche Verwendung von Politur entfernen. Tragen Sie eine leichte, gleichmäßige Schicht mit einem sauberen, weichen Tuch auf und polieren Sie vorsichtig mit Flanell oder Wildleder. Wischen Sie dann mit einem feuchten Tuch nach, um statische Elektrizität zu entfernen, die Staub anziehen kann.

Laver avec du savon ou un détergent neutre et beaucoup d'eau tiède.

Utiliser un chiffon souple et propre en effectuant une légère pression, rincer avec de l'eau claire et sécher en absorbant avec un chiffon humide ou une peau de daim.

Ne pas utiliser de détergents faits maison et des solvants comme l'alcool, l'acétone, les diluants pour les peintures, etc. Pour retirer la poussière, utiliser un chiffon souple humide. Des linges secs ou rugueux peuvent griffer la surface. Il est possible de protéger et de maintenir la surface brillante ou retirer les petites griffures en utilisant, de temps en temps, un polish. Appliquer une touche légère et uniforme avec un chiffon souple propre et frotter délicatement avec des chiffons en flanelle ou en peau de daim. Puis passer un chiffon humide pour éliminer l'électricité statique qui pourrait attirer la poussière.
