# GHOST

With Ghost the power of technology creates magic. Just a simple gesture and the Ghost light comes to life, to illuminate your image. Another gesture and the illumination disappears. No traces in transparency, no shadows, nothing remains to affect the purity of reflection.

# GHOST

Ghost is a project in which we firmly believed in; a concept of a totally concealed lighting source to be applied to mirrors and mirror cabinets; either behind the reflective silvering of the mirror face or behind the black frame. A solid technical team and innovative materials permitted us to reach this goal.

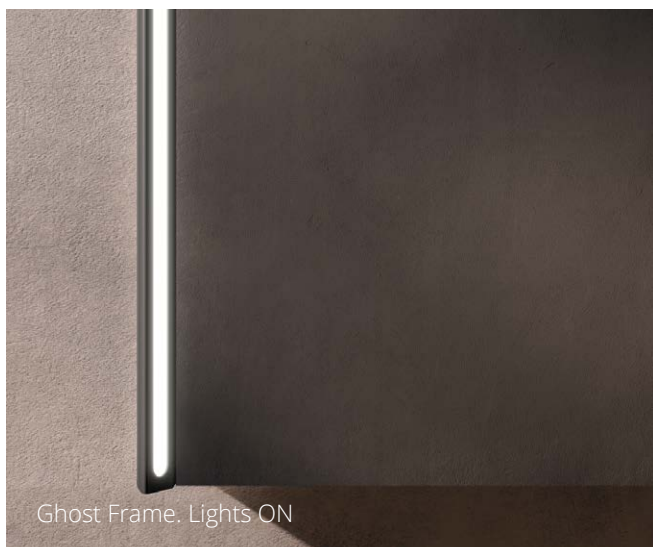

Ghost Frame. Lights ON

Ghost Frame. Lights OFF

# FEATURES

## Ghost Light Technology

The mirror in all its purity. The presence of light is invisible, it will appear only when you want it and disappear with a simple touch: with Ghost Mirror we go beyond the limits of technology to reach the essence of reflection.

## Certifications

Each product is CE marked (Technical File and Declaration of Conformity) complete with LVD and EMC Directives. Each mirror model/size is tested as a separate appliance. All products distributed in Australia and New Zealand and Japan are SAA and PSE certified respectively.

## Eco-sustainable product

The product packaging is completely plastic-free; both the aluminium frame and the Plexiglass surrounding structure used to diffuse the LED light are totally recyclable. Always attentive to the most advanced lighting technologies, we use the latest generation LED lamps that combine very high performance with very low energy consumption.

## Demister function

The heating element attached to the back side of the mirror prevents it from becoming misty with vapour typically present in the bathroom environment. The demister function keeps mirrors clear for a crisp reflection. To save energy, selected mirror models have a dedicated red switch to activate the demister function.

## Temperature colour

Choose the perfect mix. Depending on the lighting in your environment, you can vary and calibrate the tone of the light by holding down the touch sensor.

## Ambient lighting

Some mirrors and cabinets have LED lighting inserted into the metal frame for a soft lighting effect which spreads to the surrounding area. The ambient lighting adds an element of sophistication to your bathroom setting.

## 3x Magnification

A 3x illuminated magnifying mirror allows you to perform grooming tasks requiring closer attention to detail with minimum effort. The magnifying mirror is available on the Lybra and Dorado mirror models. Lybra and Dorado also have Dualwhite so you can adjust the colour of the LED lighting around the magnifying mirror to a cool white or warm white setting.

## Infrared sensor

Mirrors and mirrored cabinets with an infrared sensor can be turned on and off by simply waving your hand in front of the sensor switch. Important Note: When installing mirrors and mirrored cabinets with an infrared sensor, you will need to ensure that the side with sensor is at least 15cm away from bathroom furniture or walls. Objects placed too close to the sensor will prevent the sensor from working.

#### Touch On/Off

The illuminated touch On/Off button is flush to the mirror for a harmonious look. With Dualwhite mirrors, the touch On/Off button also controls the LED light setting.

#### Wireless Phone charger

Wireless charging is quicker and easier, as you don't have to plug and unplug each time – you just place your device on top of your wireless charging pad.

#### Safety

Mirrors have a 5mm thickness and special backing to prevent the shattering of glass in the event of accidental breakage. This safety feature gives you peace of mind, especially in a home with children.

#### The Plexiglas effect

The thin, recyclable and unbreakable Plexiglas structure diffuses LED lighting to create a beautiful halo effect when applied to EmporioBagno mirrors and cabinets.

#### Shaver socket

Integrated shaver socket.

#### USB Socket

Integrated USB socket.

#### Easy to install

All mirrors and cabinets are easy to install. The "X Hanging" system makes it possible to hang some mirrors vertically and horizontally for flexibility in your bathroom space.

# TERMS & GUARANTEES

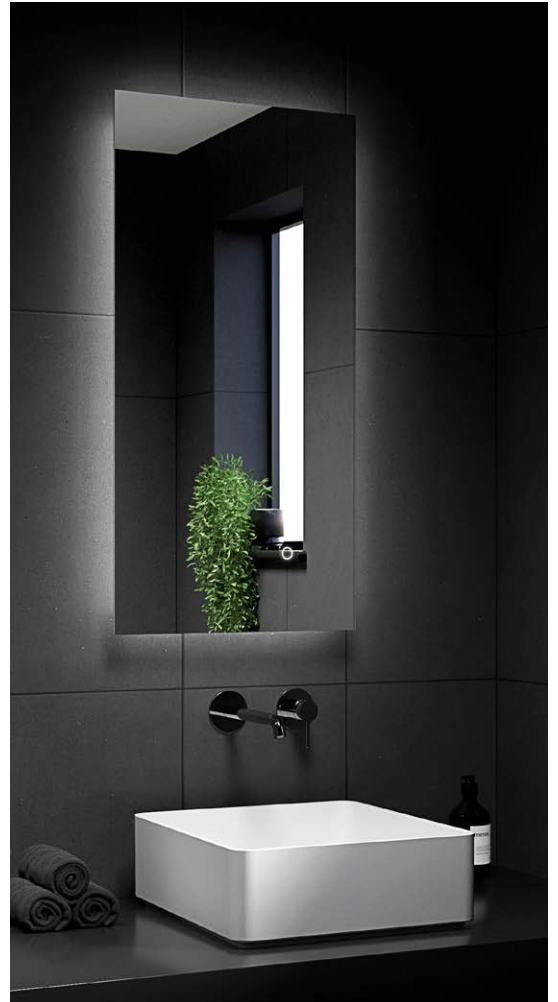

MIRRORS & CABINETS have a  
**2 year guarantee**

**The products in this brochure are chosen for their stylish design and high quality. Products can be bought with confidence, guaranteed free from defective manufacturing.**

If you have a problem with any of the EmporioBagno products in this brochure, please see the approved retailer you purchased the products from for assistance. Your EmporioBagno retailer will be happy to assist you and will work with EmporioBagno to resolve your issue. Where there is no straight forward resolution, the guarantee above applies so that you can have peace of mind. EmporioBagno products are only covered by this guarantee when purchased from an approved EmporioBagno retailer, they are installed for private domestic purposes in the UK and they have not been modified in any way.

It is important that EmporioBagno products are maintained in accordance with any special instructions provided and are otherwise cleaned carefully with suitable cleaning products. The guarantee covers products in normal domestic use and does not cover damage, neglect, misuse or inappropriate cleaning. Please note that the guarantee is offered to the original purchaser. The guarantee is in addition to and does not affect your statutory rights. To allow the continual development of the ranges, EmporioBagno reserves the right to change the colour, designs and specifications of the products in this brochure without notice.
