Everything you Need to Design your Bathroom Space

ARMANI / CASA
BATHROOM COLLECTIONS BY **Roca**

A Space For You

More than just a functional space, the bathroom is a personal sanctuary where you can reconnect with yourself. When designed to enhance wellbeing, personal care and health, this space can transform the daily routine into a meaningful experience.

At the heart of every bathroom is the basin and mirror, essential elements that go beyond mere functionality. At nightfall the bathroom provides a refuge where you can leave your worries behind, while during the day it becomes an ally in preparing for new challenges. The shower area becomes a private retreat, offering endless possibilities with innovative water features. From gentle rain that soothes the skin to an invigorating cascade that awakens the senses, there are plenty of ways to rethink this space. The toilet area combines design and functionality, offering comfort, elegance and care for intimate hygiene.

Each element is designed to suit individual lifestyles. Constant innovation drives the creation of sustainable bathrooms that immerse the body and mind for a richer experience.

We encourage you to transform your bathroom into a personal wellness space.

Small Spaces, Big Solutions

Efficient design for modern living

Tura toilet and washbasin unit, p.58 / Nu faucets, p.126 / Luna mirror, p.105 / Hotels Round accessories, p.108

Space constraints are a common challenge in modern homes, especially in big cities or densely populated areas, and the bathroom is one of the rooms where this is most evident. But a small bathroom doesn't have to mean clutter and discomfort. In fact, a compact bathroom can be incredibly cosy and exceptionally functional.

To make the most of small bathrooms, there are several solutions that optimise space without compromising on style or functionality. Compact furniture, practical toilets and smart accessories are among the alternatives designed specifically for these environments, ensuring that every inch counts while creating a tidy and user-friendly experience.

Optimisation and style in every corner

Compact and multifunctional bathroom furniture is a key ally in creating an organised and stylish bathroom, even in limited spaces. Inspired by modern architecture and Mediterranean aesthetics, the Tura and Ona collections offer versatile and elegant solutions with options that maximise space while maintaining a refined design.

Both collections feature compact and ultra-compact furniture with reduced depth. The difference is in the design: Tura incorporates a door and a practical side shelf, while Ona presents a minimalist look with a single door. With its finishes and metal base, the Mini Pro range brings style and functionality to even the smallest of spaces. These models have depths of 25 to 27 centimetres, significantly less than standard units which measures 45 centimetres. Their compact design and integrated basins make them perfect for small bathrooms, maximising storage space without overcrowding the interior.

Compact furniture is the ideal solution for small bathrooms.

Allegro accessories, p.107

Bathroom accessories are essential for keeping the space tidy without compromising on style.

Functionality without sacrificing style

For bathrooms where space is a luxury, compact toilets are the perfect solution. Most collections offer minimalist and versatile designs that blend elegantly into any environment, with soft shapes that enhance the sense of visual spaciousness. Available in wall-hung or floorstanding versions, they create a sense of openness and comfort while optimising space, contributing to a fresh and uncluttered atmosphere.

As well as being efficient for small or irregularly shaped bathrooms, compact toilets are also ideal for renovating bathrooms in older homes without a major overhaul. Their adaptable design modernises bathrooms while fitting into existing dimensions. Matt or glossy finishes add a sophisticated touch, while their shape creates the illusion of more space, making even the smallest bathrooms feel welcoming and comfortable.

Say goodbye to clutter

Bathroom accessories, like the Hotels and Allegro collections, help to keep things tidy by giving each item a specific place. These collections include pieces that can be wall-mounted, freeing up floor space and making cleaning easier. The PVD-coated and painted finishes not only provide greater durability and resistance to wear and tear, but also allow for harmonious and elegant combinations that suit different interior design styles.

Strategically placed hooks, towel rails, soap dispensers and toothbrush holders maximise bathroom space. For example, a towel rail on the side of a furniture unit is an excellent option that avoids taking up wall space and keeps the bathroom clean and functional.

Tips for saving water daily

Every Drop Counts

Plenum hand-shower, p.143 / Cala faucet, p.136

Water is one of our planet's most precious resources and it's time we started treating it as such. Roca is committed to making every drop count with innovative toilets, showers and faucets that are designed to be more efficient without sacrificing comfort or user experience. Using water wisely not only helps to conserve this precious natural resource and ensure a better future for all, but also saves you money.

Targa faucet, p.130

Why It Matters

The world is facing unprecedented water scarcity. According to the UN, half the planet's population – around 4 billion people – experience water shortages for at least 30 days a year. By 2025, 1.8 billion people could face 'absolute water scarcity'. Climate change, with its hotter summers and drier winters, is making matters worse. Droughts are no longer limited to typically hot regions; even cooler areas are increasingly affected. People in water-stressed regions have been making adjustments for years, from collecting shower run-off to sharing bath water. Now it's our turn to make a difference.

Optimise Your Flush

Recognising that bathrooms are a major area of water consumption, new and improved innovations help us become more water efficient in our daily lives. Toilets, being one of the main water-consuming fixtures in the bathroom, are a prime target for improvement. Modern dual flush toilet systems play an important role in efficient water management. Roca toilets are equipped with water-saving dual flush systems that allow you to choose the right amount of water for each flush, depending on the waste. This significantly reduces water consumption compared to non-dual systems, which can use up to 13 litres per flush. All Roca dual flush systems are easily adjustable to suit different needs – with options for 6/3 litres, 4.5/3 litres, and even 4/2 litres – and are compatible with most Roca toilets. To add to its appeal, Duplo S includes customisable flush plates with attractive designs and finishes. Innovative features including auto flush and backlighting not only enhance functionality, but also add an extra flair to your bathroom, making it an inspiring choice for both practical and aesthetic improvements.

Improve Your Shower Efficiency

Once you've nailed water saving in the toilet, it's time to tackle the shower and bath. With showers and bathtubs being the second largest source of water use in the bathroom, it is crucial to be smart about how you use water here. To optimise efficiency, consider a thermostatically controlled shower column that keeps the temperature just right and prevents unexpected changes. The T-500 range of faucets, designed for both baths and showers, delivers the desired temperature instantly and features an Eco Stop function to limit the water flow per minute, making your shower both efficient and luxurious. Choosing the right showerhead is another effective way to optimise water flow. Handheld shower heads, when used correctly, can be more water efficient – especially if you turn the water off while lathering. The Sensum handshower uses 6 l/m, about two litres less per minute than most conventional handshowers.

Manage Water Use with Smart Technology

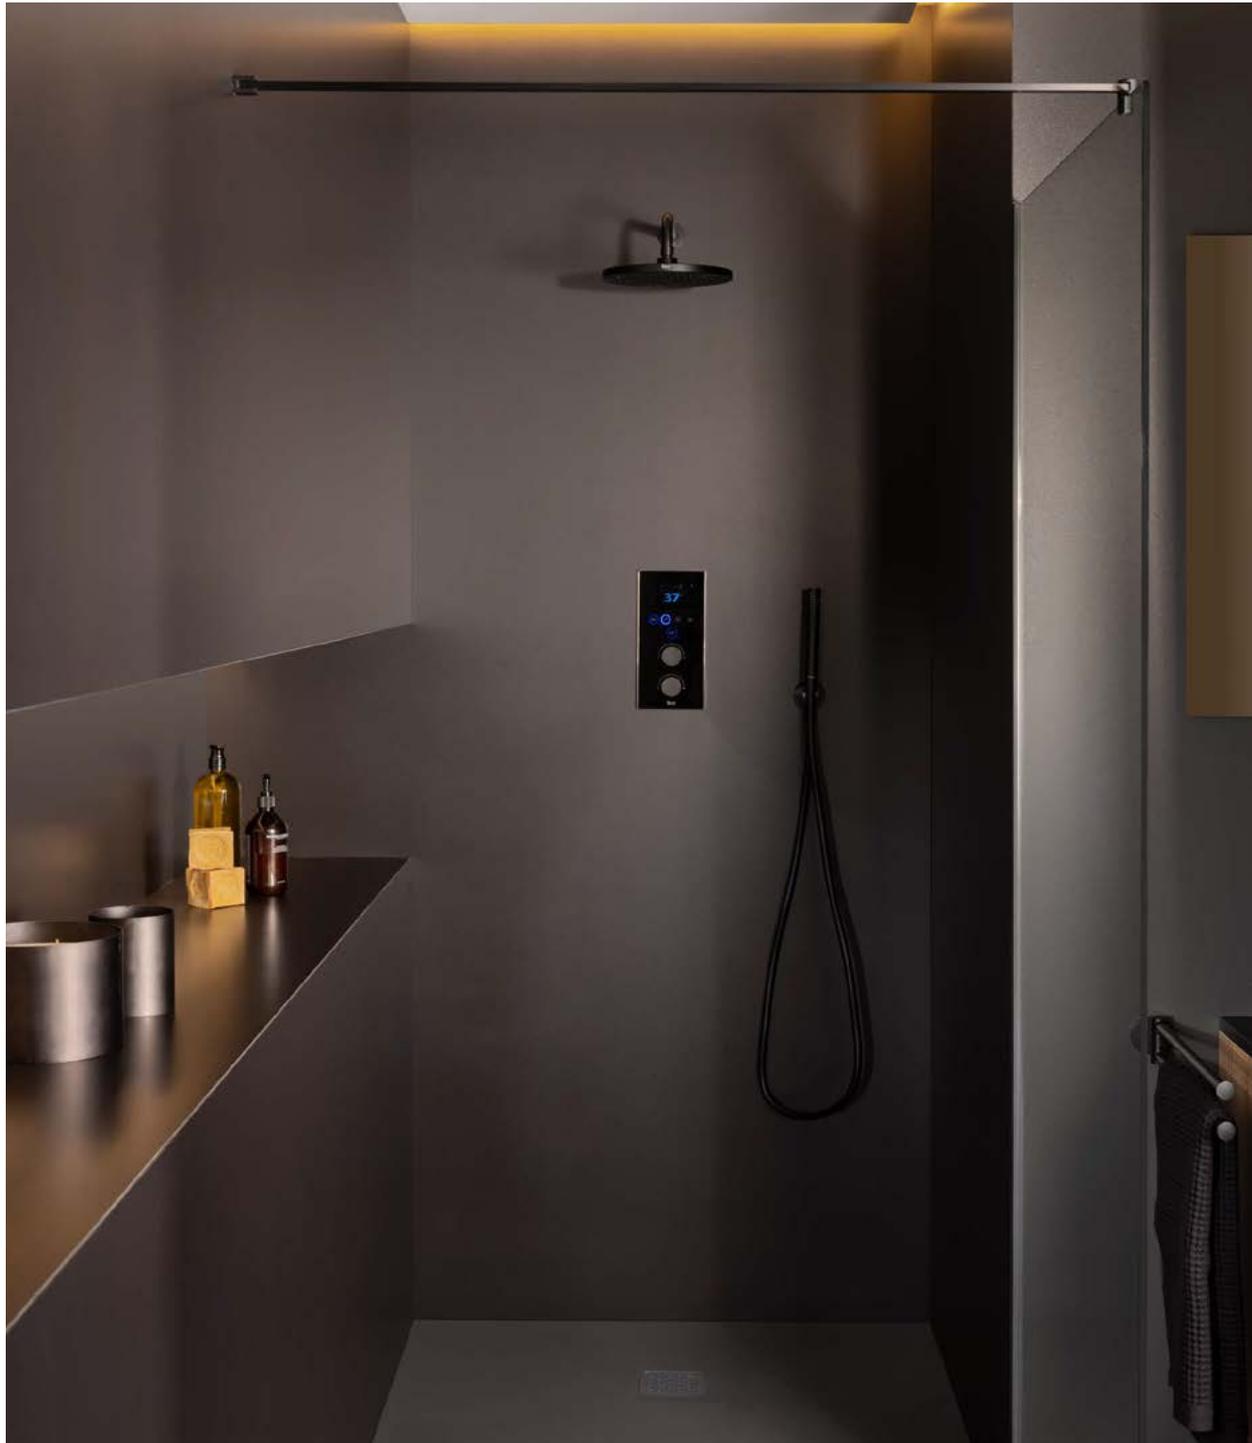

Smart shower solutions offer advanced customisation, allowing you to pre-programme the water temperature, create personal profiles for each member of the family, and regulate shower length and water flow through an intuitive control panel. With the addition of Roca Connect, you can remotely control and adjust shower settings, schedule daily operations and even manage cleaning. The easy-to-use mobile app also tracks water consumption, ensuring that the whole family can actively contribute to saving water in the home.

Limit Your Water Use

We all know to turn off the faucet when brushing our teeth and to fix leaky faucets immediately. However, the flow rate of your basin faucet also plays a crucial role in saving water, as it contributes significantly to water consumption in the bathroom. Roca faucets have a flow rate of 5 litres per minute (l/m), below the European average of 6 to 6.5 l/m*, and the colourful Nu bathroom faucets further reduce this to 4.3 l/m. Your choice of efficient faucets can make a big difference to your everyday water savings.

*Source: The Conscious Challenge

As the UN says, by saving water, we save lives. Developing a water-wise mindset and understanding the impact our choices have on this vital resource is crucial. Choose products that not only conserve water, but also follow sustainable practices by implementing water-saving strategies from production to everyday use.

Mastering the Shower Experience

Create your ideal shower with
perfectly matched elements

Few things are as enjoyable as a revitalizing shower. Whether it's at the beginning or end of the day, or just for a mid-day refresher, a pleasurable shower experience makes for a better start. With a comprehensive range of bathroom solutions available, there are no excuses not to create the shower of your dreams. From shower trays and enclosures to faucets and smart technology, here's everything you need to create the perfect shower experience.

Aquos shower tray, p.156
Line Plus shower enclosure, p. 164
T-500 faucet, p.141
Stella Stick hand-shower, p.143
Raindream shower-head, p.146

The right choice of shower enclosure is the key to a perfect fit and improved accessibility

A solid foundation

Every great shower starts with a sound base. Picture yourself stepping into a shower where every detail has been thoughtfully designed for your comfort. Gone are the days of slippery surfaces and messy drains filled with hair. Instead, you stand on a sleek, stone-like Stonex® surface that's both slip-resistant and ultra-hygienic. Available in a variety of colours, Terran-N and Pyros shower trays can match any bathroom style. These trays can be customised to fit perfectly in any size bathroom, ensuring a seamless and elegant look.

Once your tray is in place, it's time to choose the right enclosure. For those with smaller spaces, a sliding shower door is an ideal choice, offering both functionality and a modern aesthetics. In larger bathrooms, a swing door from the Brisa or updated Victoria collection can provide a grander entrance and a touch of style. Made from tempered glass, these durable enclosures offer added strength. For improved accessibility, choose flush-to-floor designs and open-door enclosures to ensure safe and easy access for everyone.

Pyros shower tray, p.156 / Brisa L2-E+LF-C shower enclosure, p.164 / Cala faucet, p.136 / Raindream shower-head, p.146

Get smart in the shower

Imagine stepping into your shower, turning it on and instantly having the ideal water temperature and pressure. This seamless experience is made possible by thermostatic mixers that maintain a constant temperature, eliminating those sudden, uncomfortable changes that can interrupt this perfect moment. For ultimate control and convenience, T-Multi and Multi-Switch ensure comfort for every member of the household.

For a next-level showering experience, upgrade your shower with a customisable Smart Shower that remembers your preferred settings – temperature, flow and water outlets. With easy-to-use dials and touch-sensitive buttons that light up, the Smart Shower control panel is intuitive for everyone, from the youngest to the oldest. For added convenience, the Smart Shower app gives you full control directly from your mobile, so every shower is tailored to your needs.

Find your flow

Complete the experience by exploring the extensive range of shower solutions available. Whether you prefer a gentle, rain-like shower with the Raindream or a more intense, multi-pressure system to soothe sore muscles with Stella, Sensum or Plenum hand showers, there are plenty of options to suit all tastes. Modern showerheads offer multiple flow options, including rain, tonic and pulse to ensure a satisfying experience for everyone. The Plenum collection also features Micro Bubble technology, a spray that penetrates deep into the skin's pores, making it ideal for gentle face and body cleansing.

To elevate the look of your bathroom, explore stylish finishes like rose gold, brushed brass or matt black. These contemporary options can add a vibrant touch to your space, making your shower not only a place of comfort but also a statement of your personal style.

**Exploring the practical
benefits of smart toilets**

The Smart Choice

In-Wash® Insignia, p.44

In-Wash® Ona p. 46 / Ona Furniture, bath and faucets, p.62 / Luna mirror, p.105 / Hotels Round accessories, p. 108

Dr. Marimer Pérez
Gynaecologist and Obstetrician

“Smart toilets represent a significant advance in intimate healthcare. With functions such as personalised washing and drying, they provide impeccable hygiene adapted to each individual’s needs, reducing the risk of irritation and promoting daily well-being. In an environment as intimate as the bathroom, technology becomes a fundamental ally in improving our quality of life.”

Dr. Marimer is a renowned gynaecologist and obstetrician with over twenty years of experience in women’s health. She founded the WoMer centre, offering holistic care from adolescence to menopause.

The evolution of the smart toilet represents a groundbreaking leap forward in personal hygiene and health, which is why choosing a smart toilet is more than just an upgrade – it’s a revolution in your daily routine. The most important change is the cleaning of the intimate area with water. Imagine a toilet that combines traditional functions with advanced technology to better clean your nether regions.

Smart toilets with integrated bidet features and state-of-the-art disinfection technologies offer unparalleled personal cleanliness. Water is far more effective than toilet paper in removing bacteria and waste, significantly reducing the risk of urinary and vaginal infections, haemorrhoids and other conditions. This gentle and thorough cleansing method minimises discomfort and irritation, setting a new standard for personal care.

In-Wash® Insignia p.44

Next page:
In-Wash® Inspira p.45

Comfort and wellbeing

Scientific research supports the superiority of cleaning with water. A study published in the *Journal of Water & Health** found that individuals who use water to clean after using the toilet have significantly fewer viruses and bacteria compared to those using toilet paper. The bidet function further reduces the transfer of microbes to the hands, enhancing overall hygiene and disease prevention.

Roca's In-Wash® smart toilets and Multiclean® shower seats are designed with personalisation in mind. Precise front and rear washing with oscillating nozzles can be particularly beneficial for feminine hygiene during menstruation, pregnancy and postpartum care, as well as for individuals recovering from surgery or people with limited mobility.

Replace the harshness of toilet paper with a warm air-drying function, offering a gentle and effective way to complete your hygiene routine. This feature is

particularly useful for those with conditions such as haemorrhoids or anal itching, as it avoids irritating sensitive areas.

Unmatched Cleanliness

Smart toilets are meticulously engineered to maintain exceptional standards of hygiene, so there is no need to worry about toilet hygiene. The self-cleaning nozzles sanitize themselves with UV light before and after each use, removing 99.99% of all bacteria. For additional peace of mind, the Roca Rimless® design optimizes water flow and prevents dirt from building up in the bowl, while the 360-degree swirl flush ensures maximum efficiency and cleanliness.

More than a luxury, these innovative toilets have become an essential part of modern living. Their impact on personal hygiene and efficiency marks a shift towards a healthier and more convenient lifestyle.

Bathroom Brilliance

Unlock the potential of your bathroom and stay ahead of this year's trends with Roca's hidden gems

In today's fast-paced world, making the right choices and adopting smart solutions is essential to maintaining balance – and your bathroom is no exception. Bringing this core space up to date with what's trending this year doesn't need to mean a complete overhaul. Often, strategic adjustments can result in a remarkable transformation without disrupting the existing décor and fittings.

By focusing on key elements, such as flush plates, faucets and accessories, you can infuse your bathroom with a fresh, modern look and save time and money that may otherwise be spent on a major renovation. These products have been designed to integrate seamlessly with current setups, offering a straightforward and convenient way to enhance both functionality and aesthetics. From sleek, contemporary faucets to stylish and efficient flush plates and chic accessories, these upgrades can breathe new life into any bathroom, making it a space you'll love using every day.

To inspire your transformation, we have created a mood board for each trend, to help you visualise the possibilities and bring your creative design concept to life.

Warm and cosy

If you want to turn your bathroom into a place to unwind and relax, choose warm and cosy colours. Consider the matt green and sand grey tones from the Ona collection to establish a serene foundation. The use of textured walls and moisture-resistant rugs add to the welcoming ambience, making every visit a calming experience.

For an instant refresh, update the basin cabinet with one featuring a terracotta finish and incorporate natural wood shelving units. This simple yet effective approach will infuse the space with warmth. For a modern touch, add flush plates in these same rich wood finishes and to further enhance the tranquil atmosphere, complement with handcrafted details and soft ambient lighting.

Innovation in materials

The evolution of materials is reshaping the aesthetic of the bathroom. Polished cement, ceramics, slate and moisture-resistant treated wood are transforming traditional spaces into visually striking environments

Picture a polished cement slab, creating a sleek and minimalist look that contrasts beautifully with wood or gives the bathroom a raw, brutalist appeal. Bring a sleek, reflective quality to this modern aesthetic with a flush plate or a robe hook in a chrome finish.

Ohtake washbasin, p.74
Ona faucet, p.128
Hotels Round accessories, p.108

Next page:
Ona washbasin, p.62
Targa faucet, p.130
Plenum hand-shower, p.143

Gold accents

A gold finish can be used to complement both vintage and contemporary styles. For a more luxurious effect, combine gold details with darker surfaces like stone or tile, and complete the look with marble or granite for added sophistication.

Combining marble with a flush plate or robe hook in a gold finish creates an opulent bathroom aesthetic. The gleaming gold against the elegant veining of the marble evokes a sense of luxury and grandeur, perfect for those who appreciate this style. For a modern

twist, combine a gold handshower with marble tiles to add a touch of glamour and refinement to your daily routine.

To take the sophistication up a notch, pair a gold faucet with a granite sink. The rich, reflective quality of gold juxtaposed with the robust texture of granite creates a striking balance between visual richness and natural strength. This combination not only enhances the aesthetic of the bathroom, but also gives the space a warm, inviting glow.

 accessories, p.108

The triumph of matt white

Matt white is a versatile choice that can significantly elevate the visual appeal of any bathroom. Whether used as the dominant colour or as a subtle accent, white can help create a sense of balance and tranquility. To achieve an immediate modern upgrade, replace items such as soap dispensers, towel rails and faucets with white versions, which will immediately add a clean, minimalist touch to your space.

Biophilic design

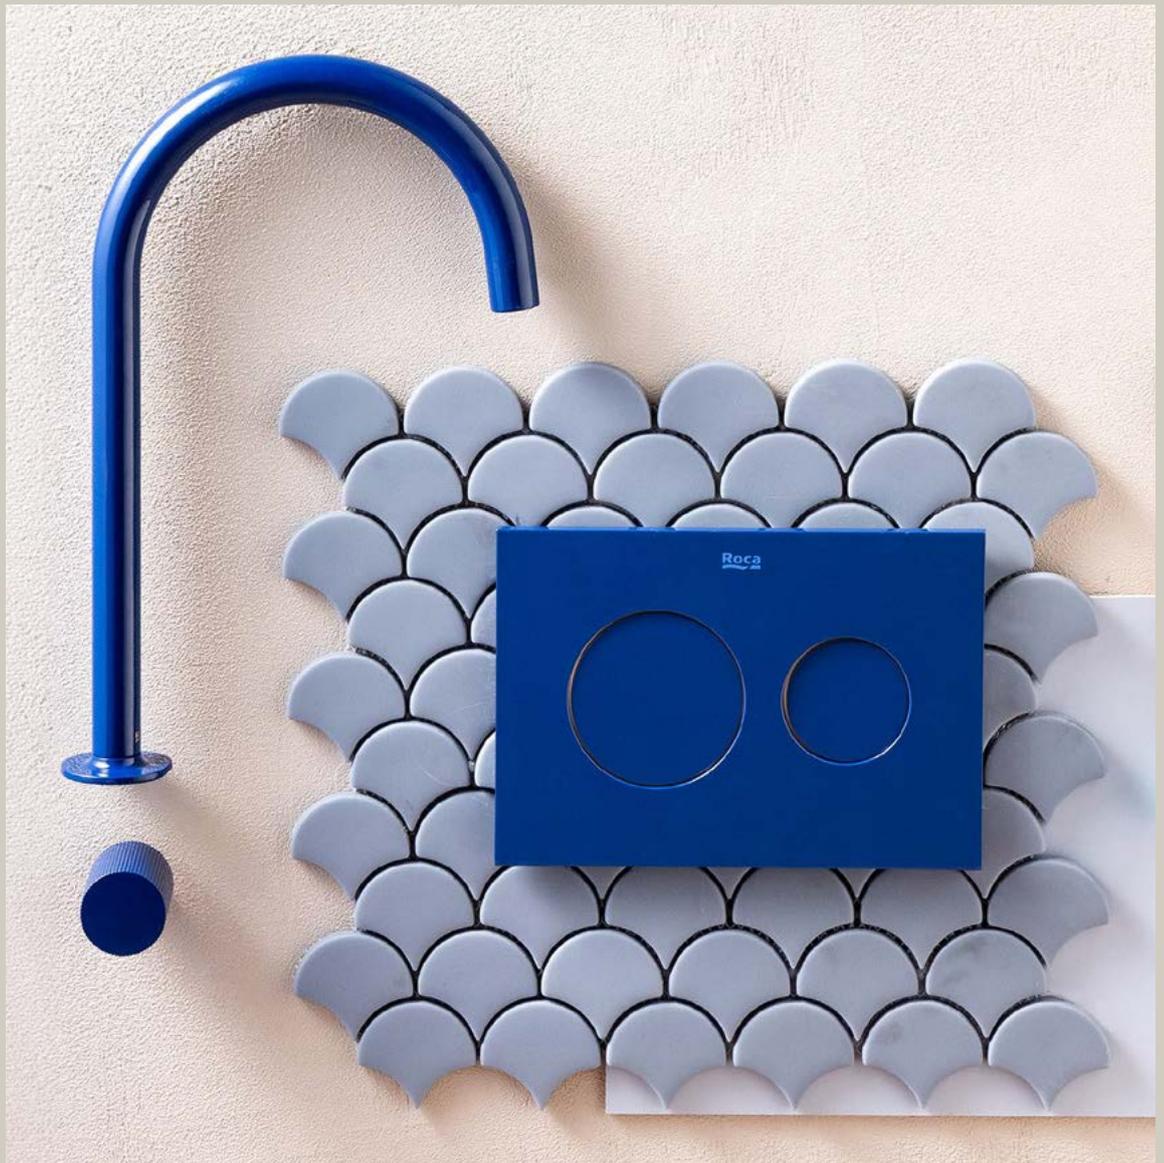

The concept of biophilic design encourages us to bring natural elements into our bathrooms to foster a connection with nature. Start by introducing some greenery in the form of plants or decorative mosaics that mimic the lush colours and shapes of foliage. In line with this approach, items with matt or sage green finishes can be used to evoke the calming hues of a forest, extending the natural inspiration throughout the bathroom.

To fully embrace this design trend, infuse the bathroom with natural materials and organic-inspired pieces. A mint green flush plate, adds a refreshing visual contrast reminiscent of lush foliage and enhances the soothing atmosphere. Incorporate wood and stone elements for a timeless look, and consider cork accessories to add a tactile, earthy dimension.

Express your personality

The bathroom is a perfect canvas for personalisation, allowing you to showcase your unique style. Modern bathroom design continues to be shaped by the thoughtful use of colour schemes and textures. By embracing this trend and making intentional choices, you can create a bathroom that not only influences the mood but also reflects a distinctive and stylish character.

In monochrome bathrooms, introducing contrast – like a minimalist basin against a textured wall, or sculptural WC paired with a vibrant flush plate – can create a dynamic feel. For a bold, energetic pop of colour, consider the Nu cobalt blue faucet paired with a matching flush plate.

The New Era of the Substantial Bathroom

by Marisa Santamaría.
Researcher on global trends
in design and innovation

Marisa Santamaría is a design globetrotter with over 20 years' experience. She specialises in global design trends, teaches at top universities and writes about contemporary design perspectives.

The serene revolution of new storage, modular furniture, an atmosphere of natural balance – these are the progressive bathroom trends of 2025 and beyond.

Verso furniture, p.84 / Ona washbasin, p.62 / Targa faucet, p.130 / Luna Frame mirror, p.105 / Allegro accessories, p.107

The future of the bathroom is characterised by a transcendental sentiment focused on harmony and balance between the elements of the space, resulting in an immaculate, flawless and beautiful bathroom.

When we explore the key elements in the evolution of the bathroom, it becomes clear that contemporary design principles are centred on comfort and quality of life for the individual. The details of interior design have become crucial to all spaces, especially in the current and future bathroom.

Personalisation takes on its full meaning, allowing each individual to address their unique concerns and motivations, turning the bathroom into a space that is tailored to each person's intimacy and personality.

1

The impact of order

The organisation and arrangement of all the details and elements in the bathroom have a direct impact on the desired sense of balance. The proportions between the different components of a room always convey beauty and evoke positive feelings. Storage capacity, the ability to store and classify all everyday items. The bathroom must facilitate different sorting methods with a clear objective: to simplify, catalogue and eliminate unnecessary items. Optimal storage not only reduces stress levels, but also increases serotonin, the happiness hormone.

Collections that create an atmosphere of cosiness. Havens of intimacy.

2

The move towards modularity

A key trend in the 21st century bathroom is its evolving nature. In recent years, people have embraced the idea that change is the only constant, leading to a desire for interiors that can create different atmospheres. This means the bathroom is becoming a sanctuary that adapts to the changing needs of its users. Modular systems are emerging that allow the bathroom environment to be effortlessly transformed with different accessories or decorative elements that enhance the space according to the season, time of year or stage of life.

The development of designs with elastic usability offer flexibility and adaptability.

3

The need to optimise and adapt

The main concepts are flexibility and fluidity to achieve the optimal bathroom atmosphere and to adapt every detail to personal motivations and evolving life needs. Advanced storage solutions are modular shelves and cabinets – including adjustable, stackable shelves – that can be reconfigured as needed. Achieve multi-functionality with furniture that serves more than one purpose, as storage and organization space.

Harmony and balance in all the main functional elements and devices that make life fluid and simple.

Avant

The Future in One Piece

A global innovation, Avant is a groundbreaking all-in-one solution with all functional elements incorporated into the toilet bowl to maximise available space. It features patented flushing systems and can operate with or without electricity.

Avant's space-saving In-Tank® design focuses on delivering an exceptional bathroom experience, streamlining installation processes and optimising water use with Roca Rimless® Vortex, a patented technology developed in collaboration with SIAMP.

Venturi Effect

An innovative patented system that enhances flushing efficiency and speed by integrating the tank into the bowl

Silent

The noise level is reduced by 15% compared to a standard toilet.

Easy installation & easy maintenance

Designed for easy installation and maintenance, it ensures a hassle-free experience in any bathroom space.

Dual flush 4,5/3L

User-friendly flush control side buttons to choose between a full or half flush.

Seamless design

Integrated flushing system with leak-resistant design.

No need for electricity

New patented flush with integrated cistern without need for electrical connection (*).

Roca Rimless® Vortex

Water-saving dual-flush system with silent solution and reduced splashing effect for maximum hygiene and optimum performance.

Supraglaze®

Exclusive Roca glazing that prevents dirt adhesion for superior hygiene and easy cleaning.

Minimum flow and pressure requirements.
Check with your installer.

Andreu Carulla

As a child, Andreu Carulla (Girona, 1979) dreamed of becoming an inventor. This is evident in his sustainable designs, full of craftsmanship, which do not disregard technology, innovation, or the simplicity of materials and forms. From his studio by the lake in Banyoles (Girona), far from the hustle and bustle of the big cities, he has been reinventing tableware, furniture, lamps, and interiors since 2006, following a flexible principle: to create pieces with a conscience.

Creative director of Calma, Isist Atelier or El Cellar de Can Roca, some of his creations include the interior of the Spanish Embassy in Helsinki, the restaurant "Normal" in Girona, and the "Calma" chair and "Bolet" stool, among many other small objects of desire that are born of his curious and ever-alert mind.

Andreu Carulla received the ICONIC Award 2023 for his innovative Tura collection.

Finishes (Bath)

Ruy and Rodrigo Ohtake

Ruy Ohtake (1938–2021) was one of Brazil's most celebrated architects, known for his bold, modernist designs and innovative use of form. From Hotel Unique to his projects in the Heliópolis favela, his work has left an indelible mark on São Paulo's architectural landscape. Ruy's multidisciplinary approach extended beyond buildings to include product design. He won several awards, including the "Best of the Best" Red Dot Design Award in 2019 for his Ruy Ohtake collection for Roca.

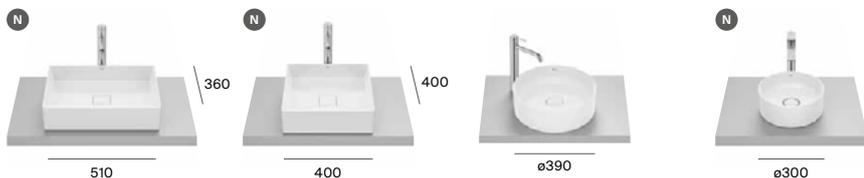

In 2022, Rodrigo Ohtake (b. 1984) took over the family practice following the death of his father, Ruy Ohtake. A graduate of FAU-USP with international experience, Rodrigo had already established his own studio in 2011, which he later merged with his father's to create Ohtake, a multidisciplinary studio focused on architecture, design, urbanism and innovative building technologies. Rodrigo's approach to design reflects his father's spirit, making no distinction between a design product and an architectural product. This mindset is evident in his recent expansion of Roca's Ohtake collection with new basin models and a bathtub that fuse organic forms, technology and functionality.

More information:

Studio Inma Bermúdez

Inma Bermúdez (Spain, 1977) and Moritz Krefter (Germany, 1978) are the two concave and convex faces of the studio that has designed the “Nu” collection. “Moritz is the millimetre, the perfection, the technique,” she says. “Inma is the forms, the language, the concept,” he replies. With a studio and home in Valencia, they have been working for companies around the world since 2007, creating emotional objects that never lose sight of their function. Their projects combine German essence and Mediterranean light, humour, irony, simplicity and respect for the environment. Their commitment to sustainability dictates the future and increasingly the present, which they imagine as respectful of materials, products and processes.

* Cold Start. ** Available with Pin, Dome and Stripes handles. ** Available with Dome and Stripes handles. Also available in Everlux titanium black, Glossy White, Mint Green, Honey Yellow and Cobalt Blue. Also available in Everlux titanium black. Dimensions in mm.

Benedito Design Studio

Founded in Barcelona by Ramon Benedito and Maite Prat, Benedito Design Studio has been devoted to product design and industrial development since 1973. In 2004 the architect Gae Benedito joined the company and has been from then on in charge of advanced projects as well as monitoring the latest technological trends in close collaboration with the designers and technical engineers that make up the current Benedito Design team.

The studio is primarily focused on the design of electronic and computer appliances, technical and scientific instruments, machines and tools, lighting fixtures, domestic objects, elements for installations and construction, packaging, and furniture.

“We are passionate about confronting technological challenges, in which we like to push the boundaries between technology, materials and geometry to create inspiring products and solutions characterized by a strong identity. Our goal as designers is to devise long lasting universal outcomes that make a positive impact on people’s lives.”

* Cold Start. ● Also available in Everlux: Stainless Steel Finish and Brushed Brass. ◐ Also available in matt black and matt white. Dimensions in mm.

Smart Shower

Intuitive use

Its capacitive technology and the ergonomic design of its rotating controls make the Smart Shower very user-friendly. Moreover, as its buttons light up when touched, its use is very intuitive, even for children or the elderly.

Self-cleaning

The Smart Shower has a cleaning program that activates all water outlets, releasing an intermittent high-pressure flow of water to remove lime and impurities, which build up in pipes and jets.

Ultrafine design

The control panel barely sticks out from the wall thanks to its 12 mm thick profile.

Smart Shower Digital Shower

2-way Smart Shower Pack

3-way Smart Shower Pack

2-way Smart Shower Pack includes:

Smart Shower, 300 x 300 RainDream shower-head, 400 wall arm, Stella Stick Square hand-shower, satin PVC flexible hose and bracket for hand-shower with integrated water inlet.

3-way Smart Shower Pack includes:

Smart Shower, 350 x 350 RainDream built-in shower-head, 3 Puzzle jets, Stella Stick Square hand-shower, satin PVC flexible hose and bracket for handshower with integrated water inlet.

Stonex®

Manufactured from high quality resins, mineral fillers and natural pigments, Stonex® shower trays feature highly durable anti-slip surfaces in a variety of textures that evoke nature.

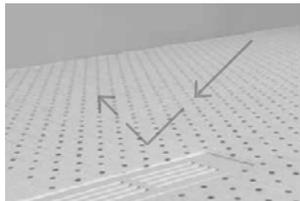

Antislip

Textured surface that ensures the highest antislip levels, while offering a very natural sensation, pleasant to the touch.

Antibacterial

Its outer layer provides the shower tray with antibacterial properties in compliance with the most demanding regulations.

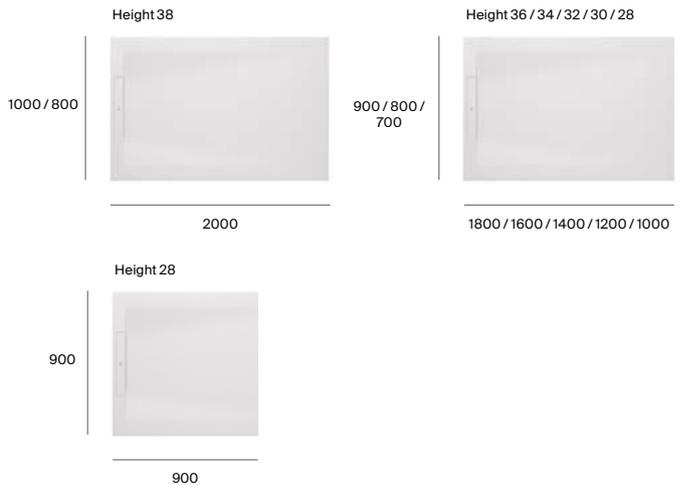

Resistance

Its exclusive formula guarantees a high resistance to wear and tear, discoloration, chemical agents and UV light.

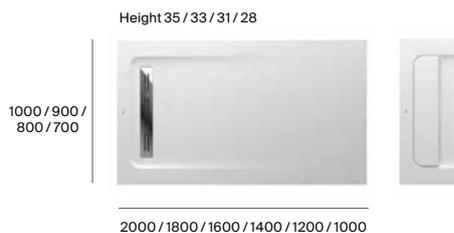

Cut-to-size

Easily adaptable to any kind of spaces thanks to its cut-to-size option.

Pyros

Aquos

Hotel Unique, a landmark in São Paulo's Jardins neighbourhood, is a celebration of bold architectural design and innovation. Designed by iconic architect Ruy Ohtake in 2002, its distinctive curved façade and avant-garde aesthetic define its legacy. In a recent renovation led by João Armentano, Roca products have been intricately woven into the architectural fabric, enhancing Ohtake's original vision.

Armentano approached the renovation with a deep respect for Ohtake's minimalist and organic design principles. His aim was to enhance the functionality and aesthetics of the space without overshadowing Ohtake's 'less is more' philosophy. Central to this transformation are the bathrooms, where Roca products become an integral part of the design narrative, combining timeless architectural forms with modern innovation.

The Ruy Ohtake basins, chosen for their flowing, organic contours, pay homage to the architect's acclaimed style and echo the fluid lines of the building. Inspired by the natural shape of an egg, these basins reflect the harmony between urban modernity and organic softness. To complement this, Armentano introduced Horizon basins, a collection characterised by geometric precision and minimalist refinement. The interplay between these two collections highlights the seamless integration of heritage and modernity.

Every detail of the renovated bathrooms was meticulously curated to complement the overall design ethos. Armentano's team hand-picked each product from the Roca São Paulo Gallery, ensuring that every element was in line with the architectural ethos of Hotel Unique.

Roca's Ona single-lever faucets, with cold start technology, not only complement the design, but also emphasise sustainability through reduced water and energy consumption while offering guests smooth, precise usage. The Inspira Round toilets, with rimless technology and advanced flushing systems, contribute to superior hygiene while maintaining a sleek aesthetic.

Roca Projects

Hotel Unique

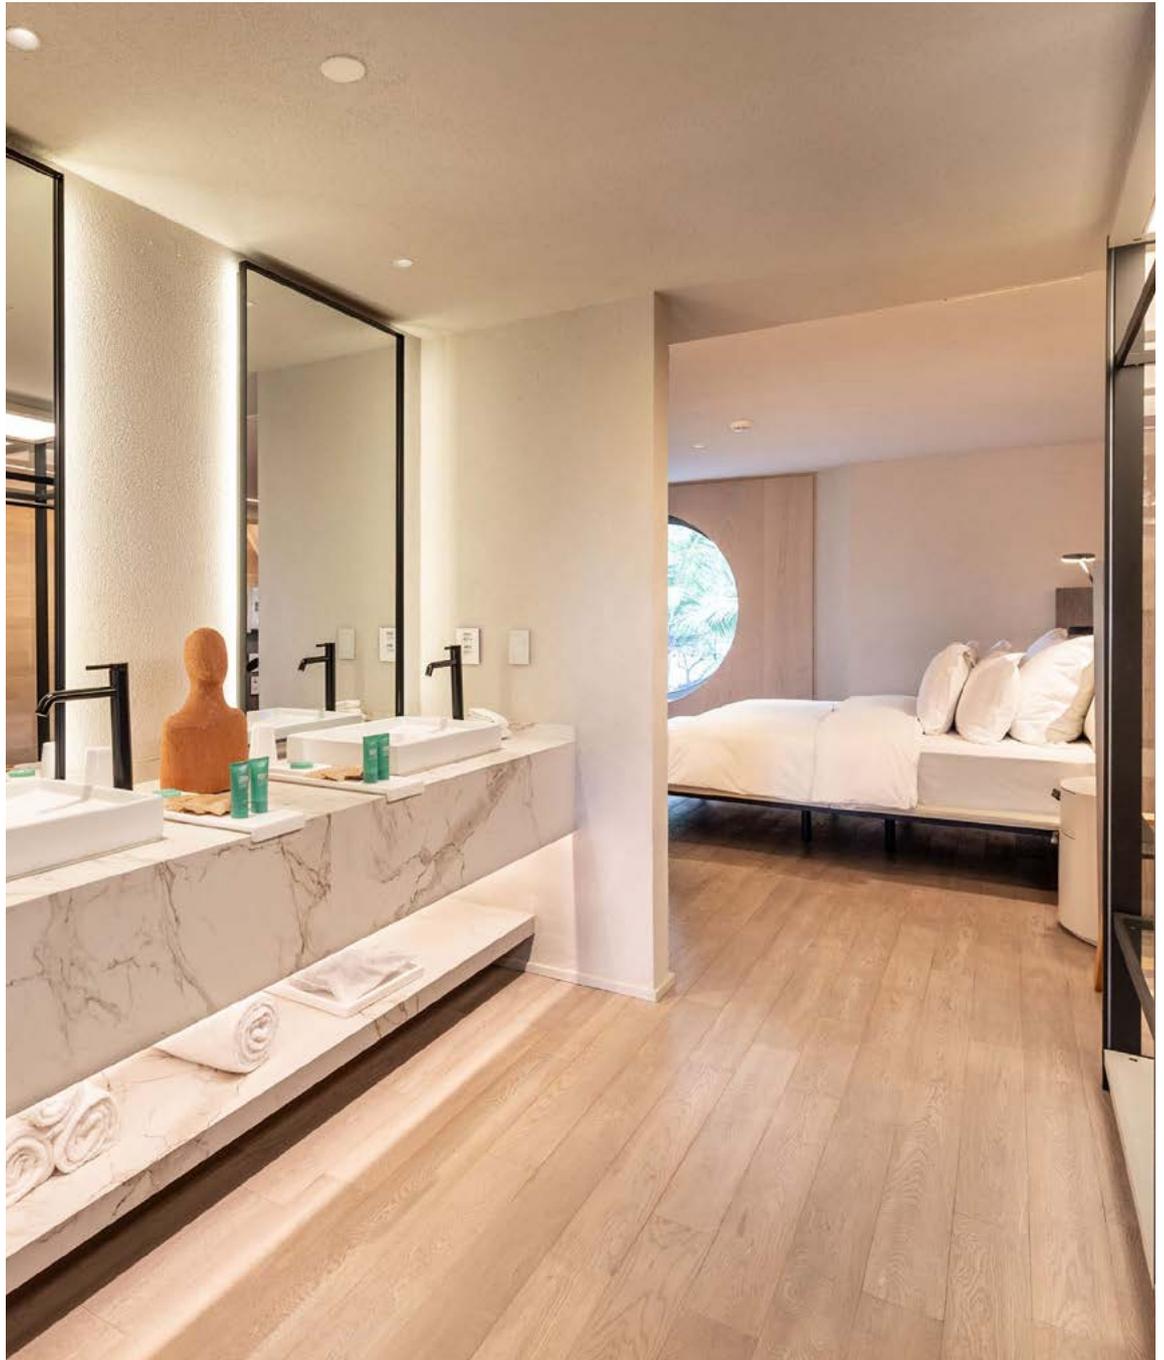

Roca's seamless integration with Ohtake's vision

Rainsense showerheads enhance the user experience with a luxurious, rain-like flow, all while resonating with the minimalist elegance of the refurbished suites.

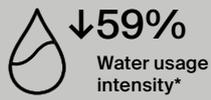

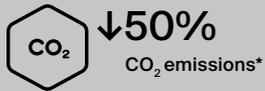

This renovation is a powerful example of how thoughtful product integration can enhance and respect the original architecture. Roca's collaboration with João Armentano underscores a shared commitment to innovation, sustainability, and design excellence.

Through Armentano's careful use of Roca products, the renovation not only revitalises Hotel Unique, but also reinforces its iconic status.

Hotel Unique remains a benchmark of excellence in luxury hospitality, a space where architectural heritage and modern design effortlessly converge, through the synergy between Ruy Ohtake's vision, João Armentano's approach and Roca's innovative solutions.

Our contribution to a more sustainable future for all

Our commitment to sustainable growth and development prioritises the wellbeing of people and the planet. This commitment is reflected in our efforts to foster strong societal relationships and support communities, as well as initiatives in decarbonisation, eco-design and circularity.

Products

Dual-flush mechanism

Dual flush cisterns offer adaptable water use, ensuring efficiency for different flushing requirements while reducing overall water consumption.

Smart shower

Smart shower solutions allow programmable shower options and monitor water usage to encourage responsible and sustainable use.

W+W

Integrating the washbasin and toilet into a single piece, this internationally acclaimed design reuses water from the washbasin to flush the toilet.

Certificates

Many of our products are made from FSC®-certified wood, demonstrating that the materials come from responsibly managed forests.

Unified Water Label

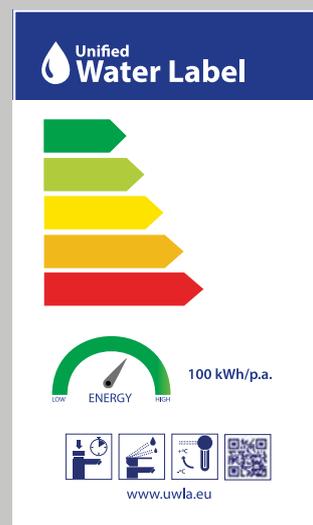

Many of our products are registered with the Unified Water Label scheme. This scheme identifies water-saving products that, when installed and used correctly, will use less water, saving energy and money.

The Water Label is used across Europe for most bathroom products. Throughout this publication, we have highlighted the faucets with the best water-saving performance, marking those that are 'best in class' in terms of water efficiency.

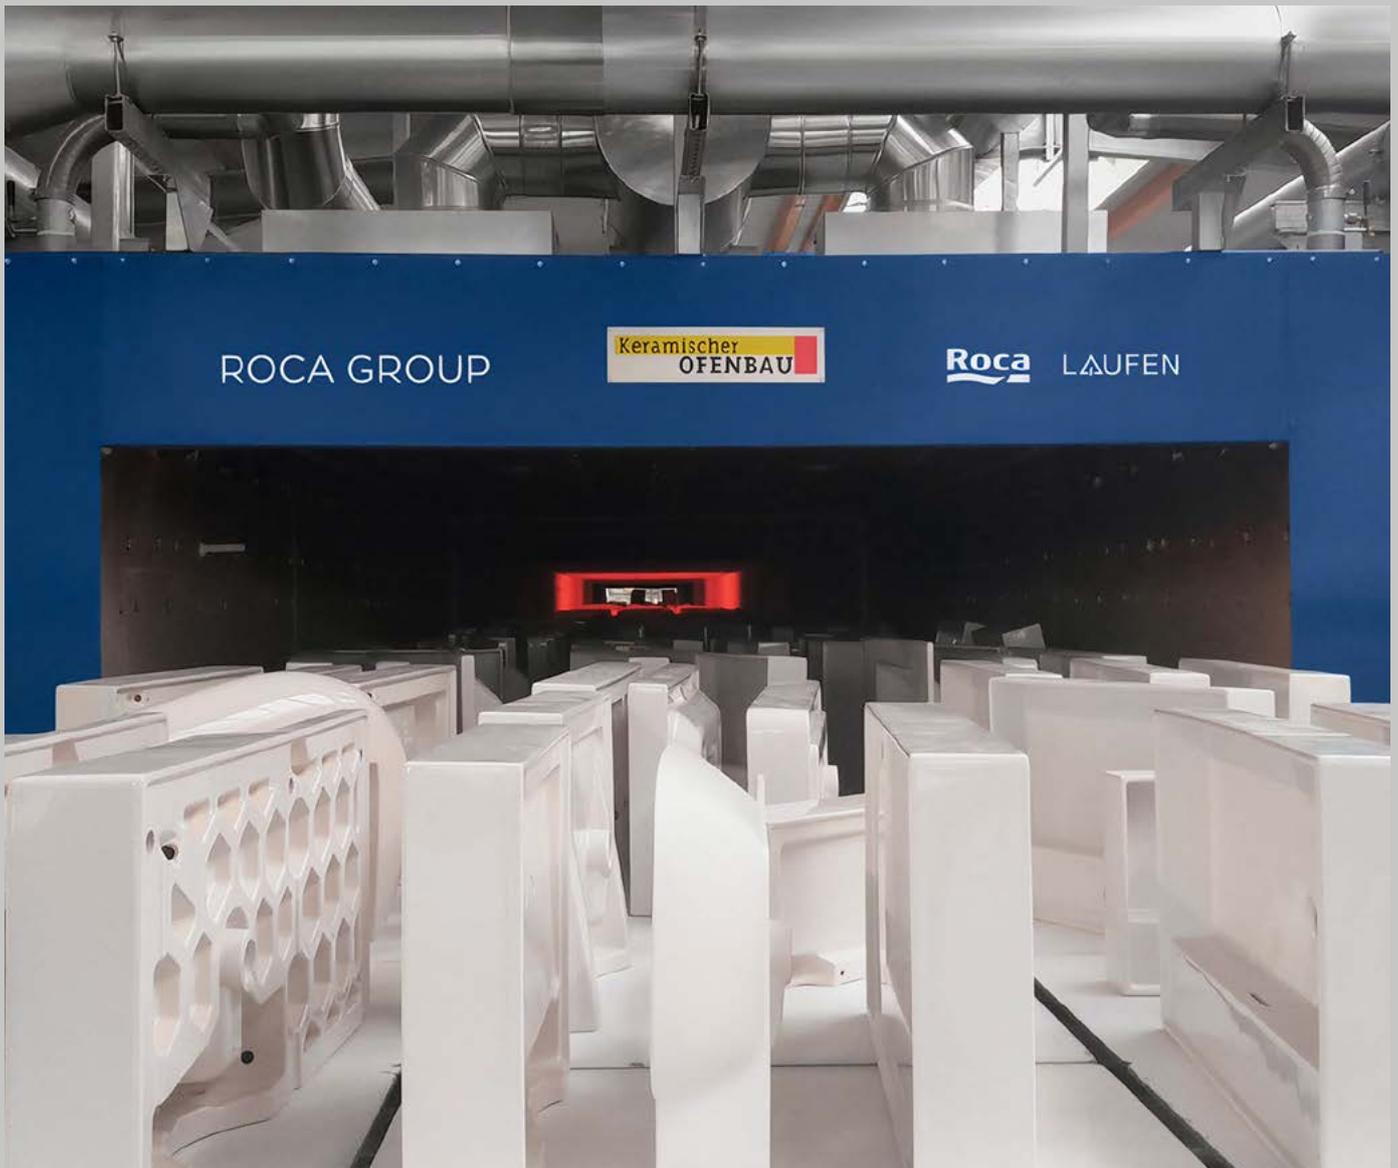

The flow rate classification is measured at 3 bar pressure. For more information and complete details on water flow rates and classification, please visit www.uwla.eu.

* Data from 2018-2023

** Data from 2023

The launch of the world's first electric tunnel kiln for sanitaryware production positions Roca as a leader in net zero manufacturing, driving a sustainable future for the ceramics industry through innovative technology.

Technologies

Cold Start

Cold Start technology prevents unnecessary boiler activation by defaulting to a cold water start position. This innovation saves energy and reduces emissions released into the atmosphere.

Aerators

Faucet spouts with aerators that mix air with water help to reduce the flow rate while maintaining the same functionality and comfort.

Thermostatic faucets and fittings

Quick Reaction® technology delivers desired temperatures rapidly and an eco-stop button contribute to water conservation in showers.

Materials

Stonex®

An improved formula for Stonex® baths uses recycled PET bottles, reducing the carbon footprint by up to 25%.

Initiatives

Pioneering sustainable ceramics

Our recent partnership with Keramischer Ofenbau marks a significant step towards sustainability as we launched the world's first electric tunnel kiln for the production of sanitaryware.

This pioneering initiative positions us as a global leader in the operation of a net-zero sanitaryware manufacturing facility, setting a new standard for the industry.

Through collaboration and innovative technology, we aim to lead the way to a sustainable future for the ceramics industry.

We Are Water

For over a decade, the We Are Water Foundation has promoted global hygiene and sustainable water management, improving access to clean water and sanitation in disadvantaged regions while raising awareness and providing training. Working in partnership with NGOs, foundations, and UN agencies, to date, the Foundation has implemented 107 projects in 40 countries, positively impacting over 4 million people worldwide.

Commitment

Sustainable and Ethical Commitment

Roca Group is committed to implementing responsible business practices that prioritise environmental protection, social responsibility and ethical behaviour.

EcoVadis Platinum Medal recognises Roca Group's outstanding sustainability performance.

As a proud member of the **United Nations Global Compact**, sustainability forms an integral part of our commitment and we work in line with the targets of the **Sustainable Development Goals**.

Barcelona
Since 1917
78 Production facilities
5 Continents
20,000 People
170 Markets

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings, we have grown into one of the largest producers of bathroom products in the world. Our designs are intuitive and intentional, driven by a philosophy of continuous improvement. Our team of experts works with leading international designers to create products that push the boundaries of innovation, refining your bathroom while bringing comfort and simplicity to your daily routine.

Despite our presence in over 170 markets, we have remained close to our Barcelona roots, contributing to and drawing inspiration from its vibrant design culture. Our products are designed for efficiency and durability, and sustainability is ingrained in everything we do - from sourcing materials to production, logistics, packaging and shipping.

Beyond our products, we address critical challenges through the We Are Water foundation, promoting sustainable water management and improving access to clean water in disadvantaged communities. We are also committed to fostering talent and creativity. Our design competitions provide opportunities for emerging designers, while our Roca Galleries and digital platform rocagallery.com host events, discussions, and feature articles on key global issues. As a leading multinational, we actively participate in key international design and architecture events, demonstrating our commitment to innovation, sustainability and teamwork, and engaging with professionals and the wider public around the world.

We celebrate the small, everyday moments of domestic happiness. At the heart of our business is the desire to develop attractive and functional solutions that make people live the best bathroom experience.

We make people live the best bathroom experience

Colour Calling

Nu Collection

Nu faucets represent a purity of visual expression and a synthesis of essential design elements: form, shape and colour. A collection that strips away the artifice to arrive at the essence of its timeless design.
